State	Finished
Completed on	Tuesday, 25 August 2026, 11:25 AM
Time taken	3 days 20 hours
Marks	1.00/1.00
Grade	**10.00** out of 10.00 (**100**%)

Question 1 | Correct Mark 1.00 out of 1.00

Convert the following algorithm into a program and find its time complexity using the counter method.

```
void func(int n)
{
    if(n==1)
    {
      printf("*");
    }
    else
    {
     for(int i=1; i<=n; i++)
     {
       for(int j=1; j<=n; j++)
       {
          printf("*");
          printf("*");
          break;
       }
     }
   }
 }
```

Note: No need of counter increment for declarations and scanf() and count variable printf() statements.

Input:

A positive Integer n

Output:

Print the value of the counter variable

Answer: (penalty regime: 0 %)

```
#include <stdio.h>

void func(int n)
{
    int count = 0;

    if (n == 0)
    {

        count++;
    }
    else
    {
        for (int i = 1; i <=n; i++)
        {
            count++;

            for (int j = 0; j <=n; j++)
            {

                count++;

                count++;

                break;

            }
```

```
29
30              count++;
31              count++;
32
33          }
34
35          count++;
36      }
37
38      printf("%d", count+1);
39  }
40
41  int main()
42  {
43      int n;
44      scanf("%d", &n);
45
46      func(n);
47
48      return 0;
49  }
50
```

	Input	Expected	Got	
✔	2	12	12	✔
✔	1000	5002	5002	✔
✔	143	717	717	✔

Passed all tests! ✔

Correct

Marks for this submission: 1.00/1.00.
